Subject: Request for Circulation of **CCDB Scholarship for Climate Change** Announcement

Respected Sir/Madam,

Christian Commission for Development in Bangladesh (CCDB) presents its compliments and greetings to you.

CCDB is a leading national NGO established in 1973 envisioning a just and caring society where people live in peace, with dignity and harmonious relationship with all God's creations. CCDB extends its reach to hundreds of thousands of underserved and vulnerable individuals across 29 districts in Bangladesh. Recognizing climate change as a major threat to vulnerable communities in Bangladesh and beyond-requiring urgent, localized, and research-based solutions, CCDB is implementing Climate Change Program since 2009, taking a holistic approach that integrates action research, capacity building, community resilience, carbon emission reduction and knowledge sharing. CCDB has established South Asia's first Climate Centre to facilitate interactive climate leaning and technology dissemination.

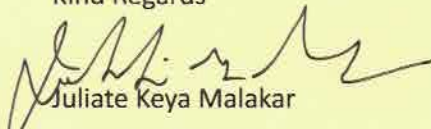

Despite the collective efforts to reduce the climate change impacts in Bangladesh, CCDB recognized the lack of adequate research capacity and interactive learning opportunities often limits the capacity of young scholars to develop practical, context-specific solutions affecting the communities most in need. To bridge this gap, we are pleased to announce that CCDB launched the Scholarship Program in 2025 for Master's in Bangladesh to foster academic research in climate change and development, and support the generation of localized, impactful knowledge for building a more climate-resilient society. **Following the successful completion of the first call in 2025, the project has now opened its second call for 2026.** In this regard, we kindly seek your valuable support in the following ways:

1. Circulating the scholarship announcement among relevant departments and faculties of your esteemed university to inform eligible and interested students
2. Displaying the attached flyer on your university's notice board to enhance visibility among students.

Please find the circular flyer, full circular & details attached herewith. We sincerely appreciate your cooperation in this regard and will greatly assist in reaching students who are committed to contributing to climate resilience and sustainable development in Bangladesh.

Thank you for your kind cooperation and support.

Kind Regards

Juliate Keya Malakar
